5

6

7 **Fact Sheet: Consent / Information and Privacy Commission NSW (IPC)**

8

9

10 First of all, a lot of thanks to the Information and Privacy Commission NSW (IPC) for organising  
11 this important consultation.

12

13 This opinion represents an opinion of an individual citizen, not any legal entity.

14

15 This opinion does not contain:

16 – any business secrets

17 – any trade secrets

18 – any confidential information.

19

20 This opinion is public.

21 Information and Privacy Commission NSW (IPC) can add the PDF file of this opinion to a relevant  
22 web page.

23

24 Annex 1 holds information about previous opinions related to information technology.

25 Annex 2 holds information about disclaimers and copyright.

26

27

28 Best Regards,

29

30

31 Jukka S. Rannila  
32 citizen of Finland

33

34 signed electronically

35

36

37

38 [Continues on the next page]

39

40

**41 Previous consultations about information systems / Annex 1**

42

43 Annex 1 holds a list of previous consultations about information systems.

44

45 Based on previous opinions I have explained several issues in detailed way. It can be noted that  
46 some issues are repeated since many consultations concentrated on information technology.

47

48 This opinion does not repeat all previous issues (mainly information technology) mentioned on the  
49 previous opinion documents.

50

**51 Email / Opt out / Simple and effective solutions?**

52

53 Email is still in use even though different social media (no email) solutions are used extensively.

54

55 In many cases email is used for official communications between two stakeholders – e.g. in many  
56 cases a shipping confirmation (letter) are sent as an email message.

57

58 Here we can note that in many cases email messages are still used for informing consent.

59

60 **Proposal: Providers of different information systems can collect email addresses of**  
61 **users if an user gives consent for this.**

62

63 **Proposal: Providers of different information systems can send regular email messages**  
64 **if an user gives consent for this.**

65

66 **Proposal: There should always be an opt-out in all email messages which are sent by**  
67 **providers of different information systems.**

68

69 In reality many providers of different information systems have already opt-out information in all  
70 email messages which they send to different stakeholders.

71

**72 Possible central register of information systems**

73

74 **Proposal: Possibly there could be a central register where information of different**  
75 **registers (public and/or private) can be added.**

76

77 Naturally this proposal can add some bureaucracy since there are several public and/or private  
78 registers. On the other hand this central register can just be a simple web page without functions.

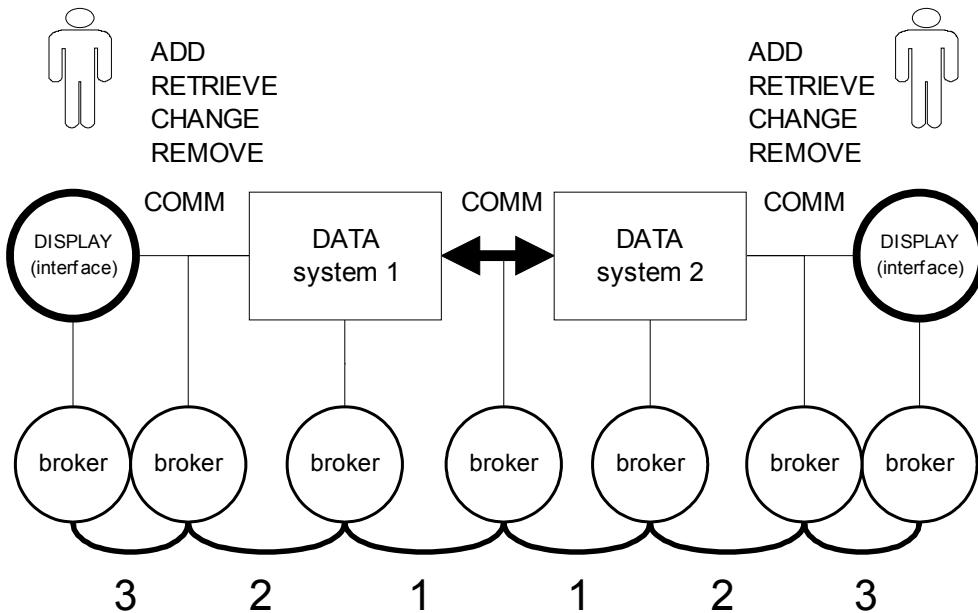

79

80 Possible central register could collect information about consent in different information systems..

81

**82 Personal information with brokered systems / Identifiers (ID)**

83

84

85

86 In reality information from one information system can be used in several other information  
 87 systems. Also there can be several brokers which can transmit information. Different broker  
 88 systems usually have internal identifier (ID). Added value can be based on combination of different  
 89 identifiers (ID).

90

91 Here we can note possible cooperation between different systems and usually cooperation between  
 92 different systems means using different identifiers (ID). There can be some central ( $S_1 \leftrightarrow S_2$ )  
 93 systems which collect information from other systems which have own identifiers (ID).

94

95 **Proposal: Different identifiers (ID) could be assessed carefully.**

96

97 **Proposal: Proposed central register could collect information about different broker**  
 98 **systems which transmit data between several information systems – in many cases**  
 99 **using different identifiers (ID).**

100

101

102

**Proposal: Information about user consent (in a possible central system) should be**  
**transmitted to other other information systems – e.g. brokered systems.**

103

104

105

**Good luck!**

106

107

108

109

This opinion is quite limited and probably other opinions will result some constructive ideas.  
 [Continues on the next page]

**ANNEX 1**

I have constructed different opinions about different issues, and on the following web page  
are all written (PDF files) opinions:

<http://www.jukkarannila.fi/lausunnot.html>

**I have constructed specifically opinions related to information systems – both in English and in Finnish.**

**Here is the list of opinions related to information systems.**

EN: Opinion 8: European Interoperability Framework, version 2, draft

330

331

332

1 Based on the Finnish three-party system there is a phenomenon called extreme-centre in Finland. The 2011 parliamentary elections in Finland challenged the three-party system, since three “old” parties were not traditionally as the three largest parties. On 2015 this “new” party is part of the current Finnish Government. We all must be interested about this new development in Finland.
